1. Executive Summary & Company Profile

Orbit Digital Pte. Ltd. is a well-established enterprise technology services firm headquartered in Singapore, with regional delivery capability across Southeast Asia. Since our founding in 2009, we have served over 200 enterprise clients and delivered more than 310 technology programmes. Our strength lies in our client relationships, delivery track record, and experienced senior team.

Orbit Digital is particularly strong in business process automation, user adoption, and operational scalability. Our approach for EDIM emphasises business outcomes over technology complexity — ensuring that the delivered platform is practical, user-friendly, and sustainable for the long term.

Attribute	Detail
Legal Name	Orbit Digital Pte. Ltd.
UEN	200912345R — ACRA Singapore
Headquarters	#20-02, One Raffles Place Tower 1, Singapore 048616
Regional Offices	Kuala Lumpur Jakarta Bangkok Ho Chi Minh City
Founded	2009 (15 years in operation)
Revenue FY2023	SGD 54 Million
Total Employees	420
Certifications	ISO 27001:2013 ISO 9001:2015 ITIL v4 Service Management
Cloud Platforms	AWS Advanced Partner Microsoft Azure Partner Alibaba Cloud Partner
Insurance	Professional Indemnity SGD 8M Public Liability SGD 3M Cyber SGD 3M

2. Understanding of Requirements

Orbit Digital approaches EDIM with emphasis on three core themes that our experience indicates are most critical to programme success: business process automation to eliminate manual procurement inefficiencies; user adoption driven by intuitive UX and structured change management; and operational scalability to support the organisation's growth over the next 5 years.

We have reviewed the full RFP and annexures. We flag one observation: the integration architecture requirements (specifically, real-time event streaming at 50,000 TPS) represent a significant technical scope that will benefit from detailed discovery before architecture is finalised. Our proposal includes a dedicated Architecture Discovery phase to confirm integration patterns before development commences.

Requirement	Orbit Approach	Status
Business process automation	Configurable workflow engine with drag-and-drop designer; 50+ pre-built templates	Fully Addressed
User adoption	UX research phase; usability testing; change management workshops; NPS tracking	Fully Addressed
Scalability	AWS auto-scaling; load tested to 30,000 concurrent users	Fully Addressed
Integration architecture	Dedicated Architecture Discovery (Week 1–3) to confirm integration patterns before development	Partially Addressed in Discovery
Security & compliance	ISO 27001-aligned controls; MAS TRM gap assessment; PDPA-aligned	Fully Addressed
DR & business continuity	Multi-AZ primary; cross-region DR; RPO ≤ 15 min; RTO ≤ 45 min	Fully Addressed

3. Proposed Solution Overview

3.1 Platform Summary

Orbit Digital proposes OrbitPlatform v6 — our enterprise-grade procurement and workflow automation suite, deployed on AWS. The platform has been deployed across 12 enterprise clients over the past 3 years and has a proven track record in regulated industries. Key capabilities:

Capability	Description	Status in Scope
Workflow Automation	Visual workflow designer; approval chains; delegation; SLA Scoping; escalation rules	In Scope
Reporting & Analytics	40+ standard reports; custom report builder; scheduled exports; executive dashboard	In Scope
User Management	Role-based access; SSO (SAML 2.0 / OIDC); self-service onboarding	In Scope
Cloud Infrastructure	AWS (ap-southeast-1 primary); ECS Fargate; multi-AZ; auto-scaling - standard	In Scope
Integration Layer	REST APIs; webhook; SFTP; Kafka event streaming (capacity 15,000 TPS) - integration required	In Scope
Mobile Application	iOS and Android apps for approval workflows; push notifications	In Scope — standard
AI Procurement Assistant	NLP-based supplier recommendation and spend analysis (Orbit v2) optional module	Out of Scope
Advanced Integration (50K TPS)	High-throughput Kafka cluster; multi-region; dedicated integration module	Architecture Discovery — additional cost

4. Implementation Approach

Orbit Digital proposes a 17-week phased delivery with a critical Architecture Discovery phase at the start to confirm integration patterns before development commences. This de-risks the programme significantly and avoids costly rework.

Phase	Weeks	Deliverables	Gate
Architecture Discovery	1–3	Requirements deep-dive; integration pattern analysis; architecture design; risk offload; client data classification	Architectural Sign-off
Configuration & Development	4–12	Platform configuration; integration development (confirmed patterns); demo workflow; 12-pointing SaaS	Staging Environment Ready
System Testing & UAT	13–15	System integration testing; performance testing; UAT (client-led); sign-off; earliest reporting from scope	UAT Sign-off
Rollout & Go-Live	16–17	Phased production rollout; user training (3 waves); hypercare; go-live dashboard; legacy system decommission	Go-Live

5. Team & Governance

Role	Name	Location	Experience	Key Skills
Programme Director	Mr. Kelvin Tan Boon Seng	Singapore	18 yrs	PRINCE2; MSP; Enterprise Programme Ma
Solution Consultant	Ms. Liyana binti Azman	Singapore	13 yrs	Business process; pre-sales; procurement
Technical Lead	Mr. Suresh Nambiar	Singapore	14 yrs	AWS; microservices; API design
Senior Engineers (×4)	KL Delivery Team	KL	6–11 yrs	Node.js; React; PostgreSQL; Kafka
QA Specialists (×2)	KL QA Team	KL	5–8 yrs	ISTQB; Selenium; JMeter
Change Mgmt Consultant	Ms. Cheryl Foo Hwee Ling	Singapore	11 yrs	Prosci ADKAR; comms; training delivery
Customer Success Manager	Mr. Ravi Krishnaswamy	Singapore	12 yrs	ITIL v4; account management

Governance: Weekly Steering Committee; fortnightly risk review; RAID log maintained in Jira; monthly financial report to client CFO.

6. Commercial Proposal

All prices in SGD, exclusive of GST, fixed for 90-day validity.

Line Item	Basis	SGD
Programme Management & Governance (17 weeks)	Fixed Fee	75,000
Architecture Discovery (3 weeks dedicated)	Fixed Fee	45,000
Platform Configuration & Development (9 weeks)	Fixed Fee	220,000
Integration Development (confirmed in Discovery)	Fixed Fee (est.)	70,000
Testing & UAT Support	Fixed Fee	40,000
User Training (3 waves; 800 users; blended)	Fixed Fee	30,000
Go-Live & Hypercare (2 weeks)	Fixed Fee	25,000
OrbitPlatform Licence — Year 1 (up to 1,000 users)	Annual SaaS	140,000
	Sub-Total	645,000
Annual Support & Managed Services (Year 1)	Annual	60,000
AWS Infrastructure (Year 1 estimate; pass-through)	Estimated	~40,000
TOTAL YEAR 1 (excl. GST, excl. AWS)	FIXED	705,000

NOTE: Integration cost (SGD 70,000) is an estimate pending Architecture Discovery. Final integration cost will be confirmed and agreed before Phase 2 commences via a formal change order.

7. Security & Compliance

OrbitPlatform is deployed using AWS Well-Architected Framework (Security Pillar) and is aligned with ISO 27001:2013 (recertification to 2022 in progress). Orbit Digital holds current ISO 27001:2013 certification, scoped to system development and managed services.

Domain	Controls	Notes
Encryption	AES-256 at rest; TLS 1.3 in transit; AWS KMS key management	Full coverage
Identity & Access	MFA enforced; RBAC; SSO (SAML/OIDC); access review	Full coverage
SIEM / Monitoring	Datadog APM; CloudTrail; GuardDuty; 90-day log retention	Wazuh available as upgrade
Vulnerability Mgmt	Annual external pen-test (CREST); Snyk in CI/CD; critical CVEs tracked	CREST SLA 72hr request
Business Continuity	Multi-AZ; cross-region DR (Singapore → KL); quarterly DR drill	RPO ≤ 15 min; RTO ≤ 45 min
MAS TRM	Gap assessment included in scope; remediation roadmap	Full compliance in 6 months post go-live
PDPA	Data residency: Singapore; DPA named; DPIA completed	Full coverage
INTEGRATION SECURITY Integration architecture security controls to be detailed in Architecture Phase Discovery		

8. Support Model

Orbit Digital operates a 24x7 support centre from Singapore and Kuala Lumpur. A named Customer Success Manager (CSM) is assigned to all enterprise accounts and provides proactive monitoring, escalation management, and quarterly business reviews.

Priority	Definition	Response	Resolution	Notes
P1 – Critical	Production system unavailable	30 min (24x7)	4 hours	CSM auto-notified; war room
P2 – High	Major feature impaired	1 hr (24x7)	8 business hrs	CSM briefed within 2 hr
P3 – Medium	Moderate feature issue	4 business hrs	3 business days	Standard ticket queue
P4 – Low	Cosmetic / query	1 business day	10 business days	Standard ticket queue

9. Client References & Experience

Orbit Digital has delivered 310+ technology programmes. Below are five relevant enterprise references. Full reference details (including referee contacts) provided in Annex C.

Client	Sector	Programme	Value	Outcome
OCBC Bank (SG)	Banking	Vendor management system; 8 integrations, SSO, 4 SAs	\$30.48M	ASITM compliant; MAS audit passed; 88 NPS
Sime Darby (MY)	Conglomerate	Group procurement platform; 5 business units, SSO, 1 SA	\$6.16M	On time; 30% procurement cycle reduction
ST Engineering (SG)	Defence/Eng	Contractor management system; ISO 27001, SSO, 2 SAs	\$20.25M	Security audit passed; zero P1 Year 1
Lazada (SG)	E-commerce	Supplier performance tracking; real-time analytics, SSO, 1 SA	\$6.12M	Delivered 2 weeks early; 91 NPS
Maybank (MY)	Banking	Branch procurement platform; 250 branches, SSO, 2 SAs	\$3.27M	On time; BNM audit passed

10. Assumptions & Clarifications

- Integration architecture (specifically 50,000 TPS requirement) will be confirmed during Architecture Discovery (Weeks 1–3) before design commences. Integration pricing assumes standard connectors; high-throughput architecture may attract additional cost.
- Client provides access to ERP API documentation and CBS representatives within 1 week of project start.
- Scope is limited to applications listed in RFP Annexure B. Additional systems are change requests.
- Formal penetration testing by Orbit Digital's accredited partner (CREST) is included for internal testing; regulatory submission is the client's responsibility.
- AWS account and network access provisioned by client within 2 weeks of award.
